Renown has taken the Red Angus breed by storm with progeny sales and elevated into a leading sire to incorporate foot quality, structural soundness, natural muscle, and overall dimension in a moderate package. His daughters are standout young females with awesome udders and they have been in high demand whenever offered. At the U2 dispersal there was an impressive group of his daughters on offer that reinforced our already strong belief in this great breeding tool. We had waited a long time to invest in a Red Angus bull and when we came across Renown he hit us hard with that need to own presence and being backed by an outstanding cow family. Ter-ron Farms fortunately partnered with us on him and we acquired him as the \$75,000 high seller. His sire, Reckoning has been held quite exclusive and any semen offered generally commands \$200+ per straw as he is considered a bull that really moved the breed forward. We feel Renown continues this progression when you combine his excellent phenotype, strong cow family backing, and now proven production history. Renown is a force within the breed and adds value to all that utilize him.
